Vladislav Lutskevich

Frontend Developer (Angular)

Minsk, Belarus • **vlad01309@mail.ru** • **vlad01309l@gmail.com** • LinkedIn • Telegram

SUMMARY

Frontend developer (**4.5+ years of experience**) deeply specialized in the **Angular** framework. Proven track record in designing from scratch and scaling high-load **ERP/CRM systems**, admin dashboards, and modern web applications (**PWA, Telegram Mini Apps**) within software outsourcing (**Belhard**) and AdTech (**AdKey.Agency**) sectors. Highly focused on delivering features that directly impact business metrics, product performance, and user experience. Actively leverage **AI agents**, custom prompts, and specialized **AI skills** to accelerate feature development, perform legacy code refactoring, and generate comprehensive **Unit tests**, significantly multiplying development velocity.

- **Architecture & Optimization:** Designed and built fault-tolerant CRM systems from scratch. Optimized client-side rendering of massive datasets and streamlined server communication logic, successfully reducing page load times by **~35%**.
- **Cross-Platform & Ecosystems:** Developed a mobile CRM application using **Ionic** for iOS and Android with push notifications. Successfully launched **Telegram Mini Apps**, driving user **engagement** up by **~18%**.
- **Quality & Processes:** Initiated the global redesign of large-scale systems alongside refactoring legacy code under enterprise **Angular standards (NgRx, Reactive Forms, ag-Grid)**. Regularly conduct comprehensive code reviews.
- **AI-Assisted Development:** Integrated the **Cursor + Claude** ecosystem into daily development workflows. Configure context rules, custom **AI skills**, and automated technical documentation pipelines, cutting routine task completion time by **~40%**.

TECHNICAL SKILLS

- **Core Technologies: Angular**, **TypeScript**, JavaScript (ES6+), **RxJS**, **NgRx**, HTML, CSS, SASS/SCSS, React, Redux
- **Interfaces & UI Components: ag-Grid**, **AmCharts**, **Reactive Forms**, **PWA**, **Telegram Mini Apps**, **Ionic (iOS/Android)**
- **Tools & DevOps:** Git, GitLab, Bash, Postman, Jira, Confluence, Scrum/Agile
- **AI Tools (AI-Assisted): Cursor**, **Claude Design**, AI Skill Configuration, Automated Test & Documentation Generation via AI

WORK EXPERIENCE

Frontend Developer | AdKey.Agency | Minsk (Office / Remote) **December 2024 — Present**

AdTech agency and comprehensive platform for user acquisition, digital marketing automation, and internal product analytics.

- **Development & Redesign:** Engineered primary internal **CRM and analytical dashboards from scratch**. Executed a **global redesign** of the existing platform, delivering a **pixel-perfect** layout matching strict UI/UX specifications.
- **Performance Optimization:** Performed a deep **refactoring of legacy code**, streamlining state management via **NgRx and RxJS**, which substantially maximized system scalability and boosted rendering speed of complex data views by **~30%**.
- **Progressive Technologies:** Successfully integrated **PWA capabilities** into web applications, minimizing application downtime under unstable network connections and fixing intricate cross-platform and cross-browser compatibility anomalies.

- **AI-Assisted Workflow:** Deployed **Cursor and Claude Design** into everyday agile development cycles. By architecting tailored system prompts and contextual **AI skills**, automated boilerplate code generation and accelerated frontend feature delivery by **~40%**.
- **Engineering Processes:** Regularly conducted rigorous **code reviews** and cross-team knowledge sharing, standardizing engineering best practices and upgrading overall codebase health.

Frontend Developer | Belhard | Minsk (Office) **April 2022 — December 2024**

Major IT corporation specializing in high-load enterprise solutions and software portals for business process automation.

- **Complex Interface Engineering:** Designed and shipped several enterprise-level **CRM systems and admin dashboards from scratch** using **ag-Grid and Reactive Forms**, providing optimal rendering speeds for huge arrays of data tables.
- **Analytics & Visualizations:** Developed real-time tracking and dashboard analytics widgets with **AmCharts** in tight collaboration with the marketing team, enhancing accuracy and acceleration of core business metrics visualization by **~25%**.
- **Mobile Development:** Built and shipped a cross-platform mobile CRM application leveraging the **Ionic** framework, strictly adapting components to iOS Human Interface and Android Material Design guidelines. Integrated **deep linking** and **push notifications**, boosting user engagement by **~15%**.
- **Ecosystem Implementations:** Authored a suite of ecosystem-driven **Telegram Mini Apps**, effectively opening new high-conversion interaction channels for users.
- **Optimization & Architecture:** Resolved deep-seated cross-browser compatibility flaws. By fine-tuning client-side rendering architecture and optimizing server query batching, successfully truncated heavy data table loading times by **~40%**. Regularly performed thorough **code reviews** to sustain robust codebase architectural integrity.

EDUCATION

Belarusian State University (BSU) **2018 — 2022**

Faculty of Applied Mathematics and Computer Science (FAMCS) | Bachelor of Applied Mathematics

The Rolling Scopes School **2021 — 2022**

JavaScript / Frontend Development Course

LANGUAGES

Russian (Native) • **English — B2**
